Coloplast Product Guide

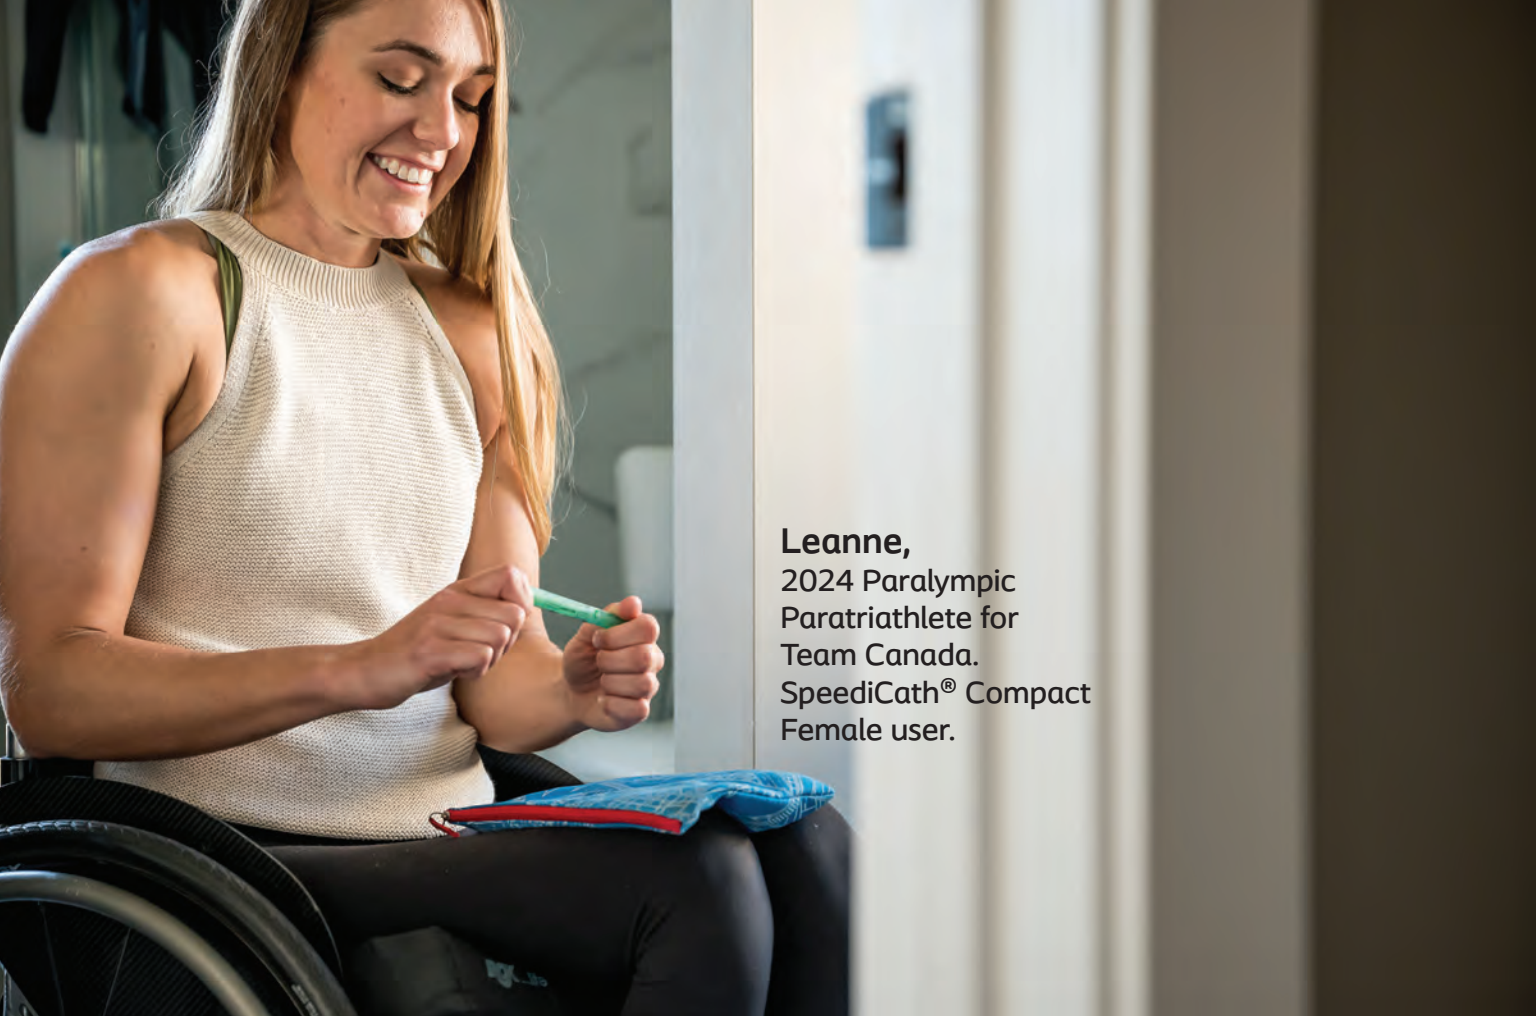

Leanne,
2024 Paralympic Paratriathlete for Team Canada.
SpeediCath® Compact Female user.

Ostomy, Continence, Wound and Skin Care

Effective June, 2024

Coloplast

Leanne,
2024 Paralympic Paratriathlete for Team Canada.
SpeediCath® Compact Female user.

Leanne is 31 years old from England, and moved to Canada when she was 10. She is now a proud Canadian living in Winnipeg, Manitoba. In 2018, a cycling accident left her completely paralyzed from the waist down. Following her spinal cord injury, she fell in love with paratriathlon and went on to complete her first race just 8 months after the accident. When a fellow para-athlete introduced her to SpeediCath® catheters, she was so happy to see that they were designed with accessibility in mind. Leanne's favourite product is the SpeediCath® Compact Female catheter because it comes pre-lubricated so she can use it right out to the package. After years of training, Leanne officially qualified for the Paris 2024 Summer Paralympic Games and will be representing Team Canada this September.

Ostomy

Is your patient getting the right fit?

A poor fit to the peristomal body profile is the main cause of leakage and skin complications.[1,2]

BodyFit Technology®

BodyFit Technology® is an elastic adhesive technology unique to Sensura® Mio and is the foundation for achieving the right fit.

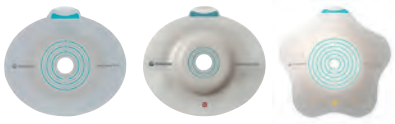

Secure *body* contact for protection

Flexible *fit* during movement

Wider-lumen outlet provides effective drainage for patients with thicker output; connects to Coloplast fistula drain bag #14010

Soft outlet provides effective drainage; connects to a standard drain bag or Coloplast fistula drain bag #14010

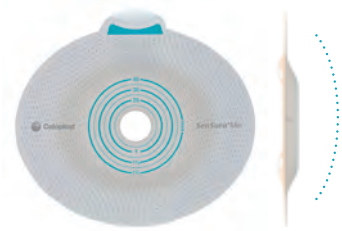

The SenSura® Mio range with BodyFit Technology®, makes it easier to provide an appliance with the right fit to body

The SenSura® Mio range with BodyFit Technology® makes it easier to provide an appliance with the right fit to body

BodyFit Technology®

BodyFit Technology® is an elastic adhesive technology that is unique to SenSura® Mio. BodyFit Technology® provides secure body contact for protection and a flexible fit during movement.

SenSura® Mio

A flat SenSura® Mio adhesive will usually be adequate for a person with a stoma opening positioned above skin surface.
In case of dips, creases and folds in the skin surface, a protective seal can be added to help create an even surface to ensure a secure seal.

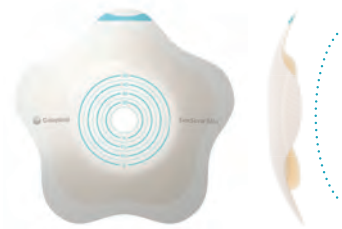

Soft Light Deep

SenSura® Mio Convex

For a better fit to an inward peristomal body profile, consider a SenSura® Mio Convex solution:

- Convex Soft, for stomas above skin level that need support due to dips and creases.
- Convex Light, for slightly deep-seated areas, and for stomas with openings in level with the skin, to help the stoma protrude.
- Convex Deep, for when the stoma opening is in or below skin level to make the stoma protrude.

SenSura® Mio Concave

For people with an outward body profile, SenSura® Mio Concave with a curved fit can help obtain a secure seal without creases and folds in the adhesive.

Three more reasons why SenSura® Mio is a great choice for your patients

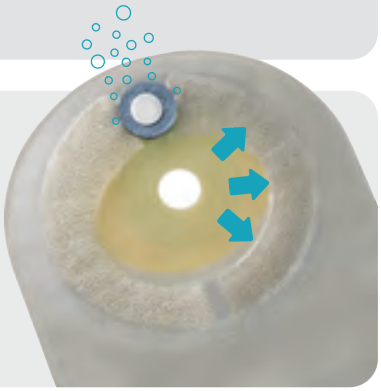

Discreet pouch colour

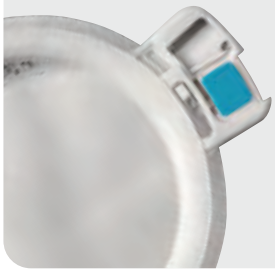

The all-textile material has a neutral colour designed to be discreet and unnoticeable, even under white clothing.

A filter you can trust

A unique, full-circle pre-filter provides greater protection against clogging.

Proven to reduce incidents of ballooning[1] by **61%**

A choice of couplings

Click coupling has a lock ring designed for reassurance and a feeling of security. An audible 'click' confirms when the lock ring is securely locking the bag to the baseplate.

Flex coupling is flexible enough to adapt to body contours and comfortable during wear, with a very low profile.

SenSura® Mio is available in many different variants for people with colostomy, ileostomy and urostomy

1. Coloplast, Clinical Study, 2010 (VV-0009690) for people with ileostomy, compared to Standard of Care

SenSura® Mio **Flex**

Ostomy Barrier and Pouch - Two Piece System

Flex adhesive coupling allows flexibility and freedom of movement.

- Only Mio Flex Convex Flanges have 4 belt attachment points.
- Not made with natural rubber latex.

SenSura® Mio Flex Skin Barrier

Cut	Convexity	Coupling Size	Stoma Size	Product Code		Units

The Brava® range covers three distinct needs

Fit to body

- *Elastic Barrier Strips* provide extra security by helping prevent baseplate edges from lifting or rolling up.
- *Protective Ring, Protective Ring Convex, Paste & Strip Paste* fill in cavities/folds in the skin around the stoma, providing a better seal to the ostomy baseplate.
- *Belt* holds appliances tight to the skin and ensures that the baseplate stays in place.

Elastic Barrier Strips

Protect the skin

- *Skin Barrier Wipe & Spray* create a thin breathable film on the skin and reduce skin problems associated with body waste and adhesive
- *Adhesive Remover Spray & Wipe* provide a skin friendly way to remove appliances more easily.
- *Protective Ring, Protective Ring Convex, Powder & Protective Sheet* absorb moisture, helping reduce moisture-associated skin damage and irritation
- *Barrier Cream* creates a long lasting barrier effect that protects the skin against body fluids.

Skin Barrier

Adhesive Remover

Facilitate routine

- *Adhesive Remover Spray & Wipe* help facilitate easier removal of appliances.
- *Lubricating Deodorant's* multi-lubricating effect allows easier emptying of the bag and helps reduce odour when changing or emptying an appliance.

Adhesive Remover

Coloplast

The truth is:

Not all coatings are the same

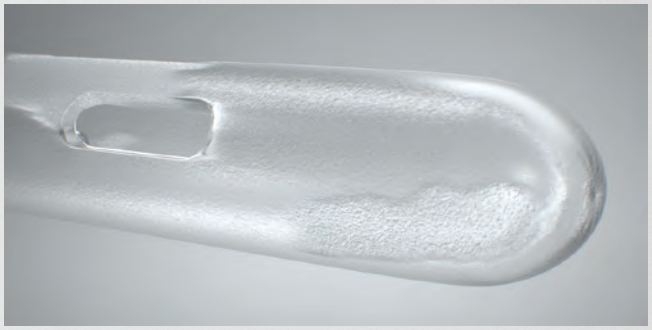

To protect the mucosa from risk of damage, complications, and UTIs, try a coating that stays bonded, stays smooth and stays hydrated.*

SpeediCath®

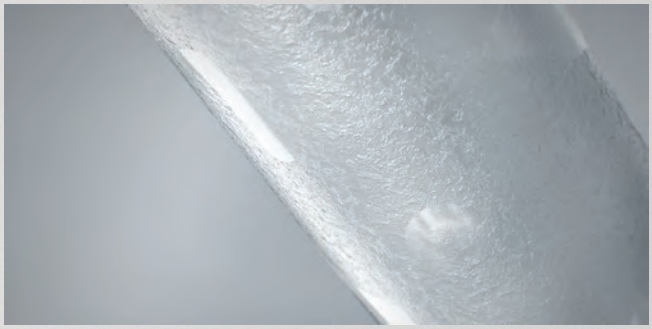

The coating plays an important role in protecting the urethra

But unfortunately, not all hydrophilic catheter coatings are the same. Some of the common pitfalls can be:

Dry spots
Some have dry spots where the coating doesn't adhere to the catheter during insertion or withdrawal.

Short dry-out time
Insufficient hydration may cause the coating to dry out over time and become rough or sticky.

* For illustrative purposes only. May not be indicative of clinical performance. Performance and experience may vary

All ***SpeediCath®*** catheters come with a unique hydrophilic coating, featuring our **Triple Action Coating Technology™**. It consists of three strongly bonded elements, designed to protect the urethra in three ways:

Stays bonded for an even coating without dry spots.

Stays smooth, reducing friction on the urethra[1].

Stays hydrated so it's instantly ready to use.

Scan this **QR code** to learn more about hydrophilic catheters:

*Limitations apply
1. Compared to uncoated catheters.
Anthony has received compensation from Coloplast to share his information. Each person's situation is unique so your experience may not be the same.
Talk to your healthcare provider about whether this product is right for you.
Prior to use, please refer to product 'Instructions for Use' for intended use an relevant safety information. PM-24135

Triple Action Coating Technology™

SpeediCath®

SpeediCath® Flex

Hydrophilic Intermittent Catheter

A soft catheter for men with a dry-sleeve and a flexible tip with all the benefits of the SpeediCath® catheter. Offered with a loop system that fits into a discreet packaging which is 100% aluminum free. Latex, phthalate and PVC free. Sterile.

Self-Cath®

Designed for patients comfort and ease of use.

Features & Benefits

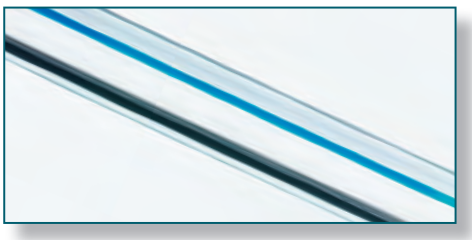

Material:

Self-Cath® catheters are made with a flexible *polyvinyl chloride (PVC)*.

Smooth and comfortable insertion:

Self-Cath® offers *fire polished eyelets* that allow the urethral mucosa to slide over the eyelets reducing the risk of being drawn into the lumen during insertion.

Easy guidance:

Self-Cath® Coudé catheters have a patented *Guide Stripe* which have a blue stripe indicating tip orientation. Therefore, patients can be sure of where the tip faces for the entire cathing experience.

Easy navigation:

Self-Cath® is available in *Straight tip*, *Tapered Tip* and *Olive Tip* option. Whichever your patients use, they may experience easier navigation through the curves and bends of their anatomy.

Self-Cath® catheters offer a range of options for many patient needs:

- Male straight and coude tip
- Female straight
- Pediatric (including 5 FR)
- Tapered coude and olive coude tips
- Available in a soft format and closed system

Mental Health Support through Coloplast® Care for your patients

At Coloplast, we recognize your importance as a healthcare professional in the lives of your patients. We also recognize that all your patients are different.

We know your time is in short supply and personalized care tailored to patients is vital. That's why we have teamed up with ***Teladoc Health*** to add mental health support to our care program. This is available to your patients who are referred to the Coloplast® Care program by you. This support provides three virtual counselling sessions and full access to the ***myStrength*** app for guidance and support.

We are here for you, supporting your care for every patient.

To learn more about Coloplast® Care contact your Territory Manager or contact us at:
1-866-293-6349 | CProfessional_CA@Coloplast.com

To sign your patients up for mental health support through Coloplast® Care scan the QR Code or visit:
visit.coloplast.ca/MentalHealthSupport

Holistic approach to your patient's care.

Emotional support

Patients have access to 3 sessions with a mental health specialist and unlimited use of the '***myStrength***' app through ***Teladoc Health***.

Reimbursement and product guidance

Patients can order product samples, receive reimbursement support, and manage their daily needs with a Care Advisor.

Resources and tools

Your patients can browse and download our digital educational resources, eBooks, and tools.

Biatain® Silicone Non-Border

Designed for high absorption and retention under compression to minimise the risk of leakage and maceration of fragile periwound skin. Can also be cut to fit areas that are difficult to dress, e.g. on the heel or in between toes and fingers. For high absorption and retention under compression. 3DFit Technology minimizes risk of leakage and maceration.

Biatain®

Foam Dressing

Soft and conformable polyurethane foam dressing that effectively absorbs and retains wound exudate. This ensures a balance that is optimal for management of exuding wounds. Available in adhesive and non-adhesive. The adhesive has a hydrocolloid border – for a secure adhesion. This product is also used in high friction and shear areas such as the coccyx.

Biatain® Fiber

Suitable for highly exuding wounds and locks in exudate and bacteria. Effectively absorbs and retains exudate and bacteria, thereby reducing exudate pooling. HexaLock Technology is the new gelling fiber for all exuding wounds.

reddot award 2017 winner

Brief Statements

Biatain® Family of Dressings

Biatain® dressings are single-use only. See the device manual for detailed information regarding complete instructions, contra-indications, warnings, precautions and potential adverse events. For further questions, call Coloplast Canada Corporation at 1-888-880-8605 and/or consult the company website at www.coloplast.ca.

InterDry®

InterDry® is a skin protectant for the management of skin folds and other skin-to-device contact areas. It reduces microbial colonization in the fabric. This single use fabric provides moisture transportation to keep skin dry while the antimicrobial in the fabric reduces odor. The safe use of InterDry fabric during pregnancy, lactation and on children has not been demonstrated. Although many patients benefit from the use of this device, results may vary. See the device labeling for detailed information including the indication, contraindications, warnings, precautions, and potential complications/adverse events. For further questions, call Coloplast Canada Corporation at 1-888-880-8605 and/or consult the company website at www.coloplast.ca.

Peristeen Plus®

The Peristeen Plus® Anal Irrigation System is intended to instill water into the colon through a rectal catheter, which incorporates an inflatable balloon, inserted into the rectum to promote evacuation of the contents of the lower colon. The Peristeen Plus® Anal Irrigation System is indicated for use by children (3 years - <12 years old), adolescent (12 years - < 18 years old), transitional adolescent (18 - <21 years old) and adult patients with neurogenic bowel dysfunction who suffer from fecal incontinence, chronic constipation, and/or time-consuming bowel management procedures.

Contraindications: Peristeen Plus® Anal Irrigation must not be used in the following situations: known obstruction of the large bowel due to strictures or tumors, acute inflammatory bowel disease, diverticulitis, complex diverticular disease, abdominal or anal surgery within the last 3 months, spinal shock phase, and in patients who are pregnant and have not used the system before (if the patient is pregnant and has never used anal irrigation before, they should not start the irrigation procedure during pregnancy).

Warning: Anal irrigation procedure should always be carried out with care. Bowel perforation is an extremely rare, but serious and potentially lethal complication to anal irrigation and will require immediate admission to a hospital, often requiring surgery.

See the device manual for detailed information regarding the procedure, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Canada Corporation at 1-866-293-6349 and/or consult the company website at www.coloplast.ca.

SpeediCath®

SpeediCath® catheters are indicated for use by patients with chronic urine retention and patients with a post void residual volume (PVR) due to neurogenic and non-neurogenic voiding dysfunction. The catheter is inserted into the urethra to reach the bladder allowing urine to drain. There is a separate SpeediCath device intended for either males or females. This is a single-use only product. Patients are to contact their healthcare professional before performing self-catheterization for the first time and follow the instructions carefully. See the device manual for further information or, call Coloplast Canada Corporation at 1-866-293-6349 and/or consult the company website at www.coloplast.ca.

Self-Cath®

Self-Cath® Catheters are intended for use in male, female, and pediatric patients (neonates, infants, children, adolescents, and transitional adolescents) requiring bladder drainage as determined by their physician. The catheter is indicated for those individuals unable to promote a natural urine flow or for those individuals who have a significant volume of residual urine following a natural bladder-voiding episode. Single-use only. See the device manual for detailed information regarding the procedure, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Canada Corporation at 1-866-293-6349 and/or consult the company website at www.coloplast.ca.

Triad™

Triad™ hydrophilic wound dressing is indicated for the local management of pressure and venous statis ulcers, dermal lesions/injuries, superficial wounds, scrapes, first-and second-degree burns, partial-and full-thickness wounds. Suitable for use on neonates.

Contraindications: Triad™ is contraindicated for third degree burns or infected wounds. See device label for complete information including warnings and precautions. For further questions, call Coloplast Canada Corporation at 1-888-880-8605 and/or consult the company website at www.coloplast.ca.
