SenSura[®] Mio

Proven Leakage Reduction*

Leakage by barrier type

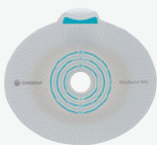

A multi-site US acute care study showed **SenSura[®] Mio users had 41% lower risk of leakage** compared to users of Hollister[®] CeraPlus[™]*

Why SenSura[®] Mio?

The first step in preventing leakage is finding a baseplate that fits snugly around your stoma. **SenSura Mio** baseplates, feature **BodyFit Technology**, which adapts to your unique body shape and flexes with your natural body movements. Choose from three distinct shapes for a perfect fit:

1) Flat:

Perfect for regular body profiles, providing comfort and mobility.

2) Convex:

Ideal for inward body profiles, flexlines ensure a secure and flexible fit.

3) Concave:

Designed for outward body profiles, creating a snug fit around bulges and curves.

Please see complete product instructions for use, including all product indications, contraindications, precautions, and warnings.

**Limitations Apply

*Based on a retrospective study conducted at 2 affiliated university hospitals; n=214 patient charts with surgery dates ranging from February 2022 to June 2023. Patient events were charted by the WOC nurse at each pouch change; review captured up to 5 pouch changes or 2 weeks of data. Statistical analysis controlled for key differences between sites and found predicted probability of leakage for SenSura Mio was 15.1% and Hollister[®] CeraPlus[™] was 25.6%, corresponding to a 40.8% lower risk (p=0.011). Coloplast data on file.

Wider-lumen outlet provides effective drainage for patients with thicker output; connects to Coloplast fistula drain bag #14010

Soft outlet provides effective drainage; connects to a standard drain bag or Coloplast fistula drain bag #14010

SenSura[®] Mio Click

As easy as place, click, **lock!**

The improved SenSura Mio Click coupling is the preferred 2-piece coupling system.¹

It is easy, intuitive and gentle to apply, with a lock that provides your patients with a reassuring feeling of security.²

"It requires almost no training because it's intuitive and easy to use."

The SenSura® Mio range with BodyFit Technology®, makes it easier to provide an appliance with the right fit to body

The SenSura® Mio range with BodyFit Technology® makes it easier to provide an appliance with the right fit to body

BodyFit Technology® is an elastic adhesive technology that is unique to SenSura® Mio. BodyFit Technology® provides secure body contact for protection and a flexible fit during movement.

SenSura® Mio

A flat SenSura® Mio adhesive will usually be adequate for a person with a stoma opening positioned above skin surface.

In case of dips, creases and folds in the skin surface, a protective seal can be added to help create an even surface to ensure a secure seal.

SenSura® Mio Convex

For a better fit to an inward peristomal body profile, consider a SenSura® Mio Convex solution:

- Convex Soft, for stomas above skin level that need support due to dips and creases.
- Convex Light, for slightly deep-seated areas, and for stomas with openings in level with the skin, to help the stoma protrude.
- Convex Deep, for when the stoma opening is in or below skin level to make the stoma protrude.

 Soft
  Light
  Deep

SenSura® Mio Concave

For people with an outward body profile, SenSura® Mio Concave with a curved fit can help obtain a secure seal without creases and folds in the adhesive.

Three more reasons why SenSura® Mio is a great choice for your patients

Discreet pouch colour

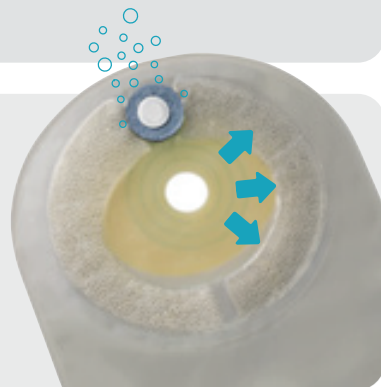

The all-textile material has a neutral colour designed to be discreet and unnoticeable, even under white clothing.

A filter you can trust

A unique, full-circle pre-filter provides greater protection against clogging.

Proven to reduce incidents of ballooning¹ by

61%

A choice of couplings

Click coupling has a lock ring designed for reassurance and a feeling of security. An audible 'click' confirms when the lock ring is securely locking the bag to the baseplate.

Flex coupling is flexible enough to adapt to body contours and comfortable during wear, with a very low profile.

SenSura® Mio is available in many different variants for people with colostomy, ileostomy and urostomy

1. Coloplast, Clinical Study, 2010 (VV-0009690) for people with ileostomy, compared to Standard of Care

SenSura[®] Mio in BLACK is here!

Choice without compromise.

Featuring the same **BodyFit Technology** to help reduce leakage and skin complications, and the same flexible fit during movement. The only difference is the colour.

Now available in *SenSura[®] Mio 1-piece* and *SenSura[®] Mio Convex 2-piece Flex drainable*, with more variants to follow.

*Limitations apply

Available in limited selection. More variants to follow.

The Brava® range covers three distinct needs

Fit to body

- Elastic Barrier Strips provide extra security by helping prevent baseplate edges from lifting or rolling up.
- Protective Ring, Protective Ring Convex, Paste & Strip Paste fill in cavities/folds in the skin around the stoma, providing a better seal to the ostomy baseplate.
- Brava Belt holds appliances tight to the skin and ensures that the baseplate stays in place.

Elastic Barrier Strips

Protect the skin

- Skin Barrier Wipe & Spray create a thin breathable film on the skin and reduce skin problems associated with body waste and adhesive
- Adhesive Remover Spray & Wipe provide a skin friendly way to remove appliances more easily.
- Protective Ring, Protective Ring Convex, Powder & Protective Sheet absorb moisture, helping reduce moisture-associated skin damage and irritation
- Barrier Cream creates a long lasting barrier effect that protects the skin against body fluids.

Skin Barrier

Adhesive Remover

Facilitate routine

- Adhesive Remover Spray & Wipe help facilitate easier removal of appliances.
- Lubricating Deodorant's multi-lubricating effect allows easier emptying of the bag and helps reduce odour when changing or emptying an appliance.

Continence

SpeediCath® Flex

Every Innovation Makes it Easy For You

Try **SpeediCath® Flex** catheter for men!

Experience the comfort of a dry-sleeve, flexible tip, designed with **Triple Action Coating Technology** to help reduce friction and minimize urethral damage¹ while catheterizing. The practical, discreet design of SpeediCath Flex catheters fit effortlessly into your daily routine.

* Limitations apply

1. Compared to uncoated catheters.

SpeediCath® Flex is indicated for use by patients with urine retention and patients with post void residual volume (PVR) due to bladder dysfunction. The catheter is inserted into the urethra to reach the bladder allowing urine to drain. The product is for male patients only. Patients performing self-catheterization should follow the advice of, and direct questions about use of the product to, their medical professional. Before using the device, carefully read the product labels and information accompanying the device including the instructions for use which contain additional safety information. The SpeediCath product is for single-use only; discard it after use. If you experience symptoms of a urinary tract infection, or are unable to pass the catheter into the bladder, contact your healthcare professional. The risk information provided here is not comprehensive. To learn more, talk to your healthcare provider. For more information call Coloplast Corp. at **1-866-293-6349** and/or consult the company website at www.coloplast.ca.

The truth is:
**Not all coatings
are the same.**

Anthony | User, Continece Care

All **SpeediCath**[®] catheters come with a unique hydrophilic coating, featuring our **Triple Action Coating Technology**[™]. It consists of three strongly bonded elements, designed to protect the urethra in three ways:

Stays bonded for an even coating without dry spots.

Stays smooth, reducing friction on the urethra¹.

Stays hydrated so it's instantly ready to use.

Scan this **QR code** to learn more about hydrophilic catheters.

*Limitations apply

1. Compared to uncoated catheters.

Anthony has received compensation from Coloplast to share his information. Each person's situation is unique so your experience may not be the same.

Talk to your healthcare provider about whether this product is right for you.

Prior to use, please refer to product 'Instructions for Use' for intended use and relevant safety information. PM-24135

SpeediCath[®]

SpeediCath® Soft

Easy to use. Easy to grip.

Introducing **SpeediCath® Soft** for men, the newest member to the **SpeediCath® Family**.

Designed with Triple Action Coating Technology a smooth and uniform hydrophilic coating to minimize the risk of damaging the urethra^{1*} and reducing the risk of UTIs^{2*}. Plus, it's instantly ready to use right out of the packaging.

Ready to use

Smooth & gentle

Easy to use

1. De Ridder, D. J. M. K., Everaert, K., Fernández, L. G., Valero, J. F., Durán, A. B., Abrisqueta, M. J., ... & Sotillo, A. R. (2005). Intermittent catheterisation with hydrophilic-coated catheters (SpeediCath) reduces the risk of clinical urinary tract infection in spinal cord injured patients: a prospective randomised parallel comparative trial. *European urology*, 48(6), 991-995.

2. Cardenas, D. D., Moore, K. N., Dannels-McClure, A., Scelza, W. M., Graves, D. E., Brooks, M., & Busch, A. K. (2011). Intermittent catheterization with a hydrophilic-coated catheter delays urinary tract infections in acute spinal cord injury: a prospective, randomized, multicenter trial. *PM&R*, 3(5), 408-417.

SpeediCath Soft is indicated for use by patients with urine retention and patients with post void residual volume (PVR) due to neurogenic and non-neurogenic voiding dysfunction. The catheter is inserted into the urethra to reach the bladder allowing urine to drain. The product is for adult male patients only. SpeediCath catheters are available by prescription only. Patients performing self-catheterization should follow the advice of, and direct questions about use of the product to, their medical professional. Before using the device, carefully read the product labels and information accompanying the device including the instructions for use which contain additional safety information. The SpeediCath product is for single-use only; discard it after use. If you experience symptoms of a urinary tract infection, or are unable to pass the catheter into the bladder, contact your healthcare professional. The risk information provided here is not comprehensive. To learn more, talk to your healthcare provider. Discreet, Stylish, & Award-Winning Catheter Design

SpeediCath® Compact Eve is an innovative catheter designed with women in mind. It's discreet, stylish, and created to help reduce the risk of UTIs¹, so you can be you.

* Limitations apply

1. Compared to uncoated catheters.

SpeediCath® Compact Eve catheters may be prescribed for patients who require bladder drainage due to chronic urine retention or post void residual volume (PVR). The product is for female patients only. Patients performing self-catheterization should follow the advice of, and direct questions about use of the product to, their medical professional. Before using the device, carefully read the product labels and information accompanying the device including the instructions for use which contain additional safety information. The SpeediCath product is for single-use only; discard it after use. If you experience symptoms of a urinary tract infection, or are unable to pass the catheter into the bladder, contact your healthcare professional. The risk information provided here is not comprehensive. To learn more, talk to your healthcare provider. For more information call Coloplast Corp. at 1-866-293-6349 and/or consult the company website at www.coloplast.ca.

Mental Health Support through Coloplast® Care for your patients

At Coloplast, we recognize your importance as a healthcare professional in the lives of your patients. We also recognize that all your patients are different.

We know your time is in short supply and personalized care tailored to patients is vital. That's why we have teamed up with **Teladoc Health** to add mental health support to our

care program. This is available to your patients who are referred to the Coloplast® Care program by you. This support provides three virtual counselling sessions and full access to the **myStrength** app for guidance and support.

We are here for you, supporting your care for every patient.

To learn more about Coloplast® Care contact your Territory Manager or contact us at:
1-866-293-6349 | CProfessional_CA@Coloplast.com

To sign your patients up for mental health support through Coloplast® Care scan the **QR Code** or visit:
visit.coloplast.ca/MentalHealthSupport

Holistic approach to your patient's care.

Emotional support

Patients have access to 3 sessions with a mental health specialist and unlimited use of the 'myStrength' app through **Teladoc Health**.

Reimbursement and product guidance

Patients can order product samples, receive reimbursement support, and manage their daily needs with a Care Advisor.

Resources and tools

Your patients can browse and download our digital educational resources, eBooks, and tools.

Advanced Wound Dressings

Biatain® Silicone Fit

Foam Dressing with Silicone Adhesive

Biatain® Silicone Fit is the latest technology in our silicone foam portfolio. It is easy to use as part of your pressure injury prevention protocol and can be applied, lifted and reapplied at least 5 times over 3 days. Biatain Silicone Fit matches the shape and depth of the wound bed up to 2 cm, leaving minimal dead space where exudate can pool or leak. It creates a close fit that lowers the risk of infection and maceration. Choose from 12 of our Biatain Silicone Fit foam dressings to suit your facility's needs. All sizes are indicated for both pressure injury prevention and wound management.

* This product has the Pressure Injury Prevention indication.

Biatain® Silicone Non-Border

Designed for high absorption and retention under compression to minimise the risk of leakage and maceration of fragile periwound skin. Can also be cut to fit areas that are difficult to dress, e.g. on the heel or in between toes and fingers. For high absorption and retention under compression. 3DFit Technology minimizes risk of leakage and maceration.

Biatain®

Foam Dressing

Soft and conformable polyurethane foam dressing that effectively absorbs and retains wound exudate. This ensures a balance that is optimal for management of exuding wounds. Available in adhesive and non-adhesive. The adhesive has a hydrocolloid border – for a secure adhesion. This product is also used in high friction and shear areas such as the coccyx.

25 x 92 cm	10 x 36"	7912	10
25 x 366 cm	10 x 144" textile on a roll	7910	10

Brief Statements

Biatain® Family of Dressings

Biatain® dressings are single-use only. See the device manual for detailed information regarding complete instructions, contraindications, warnings, precautions and potential adverse events. For further questions, call Coloplast Canada Corporation at 1-888-880-8605 and/or consult the company website at www.coloplast.ca.

InterDry®

InterDry® is a skin protectant for the management of skin folds® and other skin-to-device contact areas. It reduces microbial colonization in the fabric. This single use fabric provides moisture transportation to keep skin dry while the antimicrobial in the fabric reduces odor. The safe use of InterDry fabric during pregnancy, lactation and on children has not been demonstrated. Although many patients benefit from the use of this device, results may vary. See the device labeling for detailed information including the indication, contraindications, warnings, precautions, and potential complications/adverse events. For further questions, call Coloplast Canada Corporation at 1-888-880-8605 and/or consult the company website at www.coloplast.ca.

Peristeen Plus®

The Peristeen Plus® Anal Irrigation System is intended to instill water into the colon through a rectal catheter, which incorporates an inflatable balloon, inserted into the rectum to promote evacuation of the contents of the lower colon. The Peristeen Plus® Anal Irrigation System is indicated for use by children (3 years - <12 years old), adolescent (12 years - < 18 years old), transitional adolescent (18 - <21 years old) and adult patients with neurogenic bowel dysfunction who suffer from fecal incontinence, chronic constipation, and/or time-consuming bowel management procedures.

Contraindications: Peristeen Plus® Anal Irrigation must not be used in the following situations: known obstruction of the large bowel due to strictures or tumors, acute inflammatory bowel disease, diverticulitis, complex diverticular disease, abdominal or anal surgery within the last 3 months, spinal shock phase, and in patients who are pregnant and have not used the system before (if the patient is pregnant and has never used anal irrigation before, they should not start the irrigation procedure during pregnancy).

Warning: Anal irrigation procedure should always be carried out with care. Bowel perforation is an extremely rare, but serious and potentially lethal complication to anal irrigation and will require immediate admission to a hospital, often requiring surgery.

See the device manual for detailed information regarding the procedure, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Canada Corporation at 1-866-293-6349 and/or consult the company website at www.coloplast.ca.

SpeediCath®

SpeediCath® catheters are indicated for use by patients with chronic urine retention and patients with a post void residual volume (PVR) due to neurogenic and non-neurogenic voiding dysfunction. The catheter is inserted into the urethra to reach the bladder allowing urine to drain. There is a separate SpeediCath device intended for either males or females. This is a single-use only product. Patients are to contact their healthcare professional before performing self-catheterization for the first time and follow the instructions carefully. See the device manual for further information or, call Coloplast Canada Corporation at 1-866-293-6349 and/or consult the company website at www.coloplast.ca.

Self-Cath®

Self-Cath® Catheters are intended for use in male, female, and pediatric patients (neonates, infants, children, adolescents, and transitional adolescents) requiring bladder drainage as determined by their physician. The catheter is indicated for those individuals unable to promote a natural urine flow or for those individuals who have a significant volume of residual urine following a natural bladder-voiding episode. Single-use only. See the device manual for detailed information regarding the procedure, contraindications, warnings, precautions, and potential complications/adverse events. For further information, call Coloplast Canada Corporation at 1-866-293-6349 and/or consult the company website at www.coloplast.ca.

Triad®

Triad® hydrophilic wound dressing is indicated for the local management of pressure and venous stasis ulcers, dermal lesions/injuries, superficial wounds, scrapes, first-and second-degree burns, partial-and full-thickness wounds. Suitable for use on neonates.

Contraindications: Triad® is contraindicated for third degree burns or infected wounds. See device label for complete information including warnings and precautions. For further questions, call Coloplast Canada Corporation at 1-888-880-8605 and/or consult the company website at www.coloplast.ca.
